Quality Levels and Degree of Difficulty of Installation

STREET CONCEPT, INC is in no way responsible in the explanation to wholesale account customers on the quality of body kits. It is the wholesale customer's responsibility to explain to their retail customer the quality of level of body kits. If a kit is less expensive, then the body kit may not fit as good as a higher quality kit. The kits will probably need more prepping and extensive work on the less expensive body kits. Body kits differ in quality depending on the manufacturer of the product. **Fiberglass kits are sold "AS IS" and FINAL** it is the customer's responsibility to know all of the work involved in the installation process. Please understand fiberglass kits are not always direct bolt-on. Sometimes it is possible a fiberglass kit may need a lot of prep work including filling gaps, trimming, or grinding. STREET CONCEPT, INC recommends that the retail customer seek an experienced custom shop to do the install on body kits and know all the procedures, of installing fiberglass kits. We do not recommend a collision shop to do installs on body kits, they are only experienced on installing OEM parts that are direct bolt-on and do not know the procedure of installing fiberglass body kits. All aftermarket hoods will require hood pins, and are for off-road use only. No exceptions.

Other Restrictions

Most of the items are off-road use only. It is a customer responsibility for checking state and federal laws before ordering.
Buyer fully understands that all body kits, hoods and spoilers are sold "as is" with no warranty. Buyer also understands that due to strict U.S. Federal and State Safety crash guidelines, STREET CONCEPT, INC is not / will not responsible or liable for any damage or possible injury incurred upon possible accidents due to driver error, incorrect installations, bad judgment (cracking or breaking your parts) and any damage or accident cause by our merchandise.
Buyer understands that all body kits/hoods/spoilers/fenders may need modifications for correct fitment such as removal of safety reinforcements, removal of factory bumper lights/side marker indicators, shaving, molding, etc. Because most of these kits are prototyped and used on non-USA vehicles that have much less safety standards/requirements in their respective countries of origin, STREET CONCEPT, INC is not liable for any illegal street use of these parts.

I have read and Agree to all the terms above,
